Evaluation of alfalfa (*Medicago sativa*) lines to salinity tolerance

*Medicago sativa* (M. sativa) is a legume plant commonly known as alfalfa. It is widely cultivated for its leaves, which are used as a forage crop. The plant is also known for its ability to fix nitrogen in the soil, making it a valuable addition to crop rotations.

The image contains text in Persian, which translates to:

"Arziyaye Tahmol be Shuraye Low Inghayat Yonjehye (*Medicago sativa*)"

This translates to "Evaluation of alfalfa (*Medicago sativa*) lines to salinity tolerance".

The text discusses the salinity tolerance of alfalfa (*Medicago sativa*) lines and includes references to previous studies.
