Growth patterns of three cultivars of wheat (*T. aestivum*) and two cultivars of barley (*H. vulgare*)

Sid Merzangi, Mohammad Hassan Radshad, Mohammad Hossein Hashemizadeh Kashani

In an experiment to observe the growth patterns of three cultivars of wheat (*T. aestivum*) and two cultivars of barley (*H. vulgare*), we found that:

- The growth patterns of the cultivars varied significantly.
- The cultivars showed different responses to environmental conditions.
- Further studies are needed to understand the underlying mechanisms.
